◆ OLIVE OIL BOTTLE

Our bottles are made of glass and are used to hold olive oil, camellia oil etc. Glass bottles are great for preserving the quality of olive oil. It is equipped with an anti-backflow design to reduce air entering the bottle and maintain the freshness of the tea oil. The capacity is usually 250ml, 500ml, 750ml and 1L. The cap is well sealed, and the bottle mouth is equipped with a plastic stopper to ensure that the olive oil is not affected by air and moisture. In addition, in order to reduce the effect of light on olive oil, glass bottles can be customized into dark glass, such as the dark green and brown. We can also customize olive oil packaging of the gift box.

◆ JUICE BOTTLE

Our glass juice bottles are widely used to store and transport a wide range of beverages, such as fruit juices, tea drinks, mineral water and carbonated drinks. Because of its stable chemical properties, glass bottles have become an ideal choice for beverage bottles. Tinted or colorless glass is usually used, respectively, to display the contents of the drink or to protect the contents from light. In terms of shape and capacity design, we can make different molds according to each customer's preference. Crown caps and screw caps are more used for the sealing of beverage bottles. Different LOGO content can be customized on the lid. Compared with plastic bottles, glass has a greater possibility of recycling, and is also more suitable for gifts.

◆ GLASS JAR

In order to maintain the quality and taste of fruits and food in cans, our food cans are usually made of high-quality glass with good sealing and durability, which has a good seal and durability. This glass bottle is usually designed as a jar with a larger diameter for easy access to the built-in food and washing, so it is often reused by consumers. The closure can be customized with common metal lids, glass lids or vacuum caps. The capacity can generally be customized to the required specifications, generally 250ml, 500ml, 1L or even larger. When the product is designed and manufactured, high-temperature resistant glass can be customized to facilitate high-temperature sterilization in the production process. Due to the large neck design of these products, we generally recommend that you consume them within a short period of time after opening the label.

◆ WINE BOTTLE

Our company produces all kinds of wine bottles, yellow wine bottles, beer bottles, and spirits bottles. The shape and design of glass wine bottles are crucial for maintaining the flavor of the wine, and their advantages usually include transparency, hygiene, and not affecting the taste of the wine. Compared to plastic and aluminum can materials, glass materials with a sense of weight appear more upscale and easier to store. Different types of wine also have different requirements for bottle design. We can design and produce bottles of different specifications and colors according to customer requirements to meet the maximum customization needs.

In addition to some regular glass wine bottles, we can also customize some high-end limited edition wine packaging, including wine bottles and outer packaging gift boxes. Glass wine bottles are not only practical containers, but also a part of wine culture.

◆ OTHER GLASS BOTTLE

The glass bottles produced by our company are widely used in various industries. It can customize and produce a variety of bottles with different specifications, including small-capacity glass bottles, essential oil bottles, kitchen condiment glass bottles, medicine bottles, etc. Due to the high degree of chemical stability of glass, it is suitable for storing a wide range of liquids, while also effectively preventing the ingress of gases and moisture. Glass bottles are more environmentally friendly and textured than plastics.

◆ CAP

The main purpose of bottle cap design is to ensure that the liquid does not leak, maintain the freshness and quality of the product, and comply with food safety regulations. We can produce all customizable bottle caps for glass bottles, including anti-counterfeiting caps, screw caps, crown caps, cork stoppers, plastic caps, and tin caps. Matching to meet the needs of different wine bottles. In addition to its sealing effect, bottle caps also affect the convenience and user experience of products to a certain extent. Usually, we can design different patterns of logos or anti-counterfeiting icons on bottle caps according to customer requirements.

◆ FOOD CAN

Cans made of tinfoil (i.e., tinned thin steel sheets) are widely used in the packaging of food, beverages, chemical products, etc. Tin cans have good anti-corrosion properties, tightness and mechanical strength, making them an ideal packaging choice for many products. The surface tin plating not only improves the anti-corrosion performance of the iron can, but also increases the aesthetics and safety of the can. In order to adapt to the packaging needs of different products, the tank can usually be designed as square, cylindrical or oval. The lid can be an easy-to-open cap, a screw cap, or a plain closed lid to ensure the tightness of the contents of the can. In order to further improve the protection effect, we can apply anti-corrosion coating to the inner walls of some cans.
